4 Digit 7 Segment Multiplexed Display Arduino Board

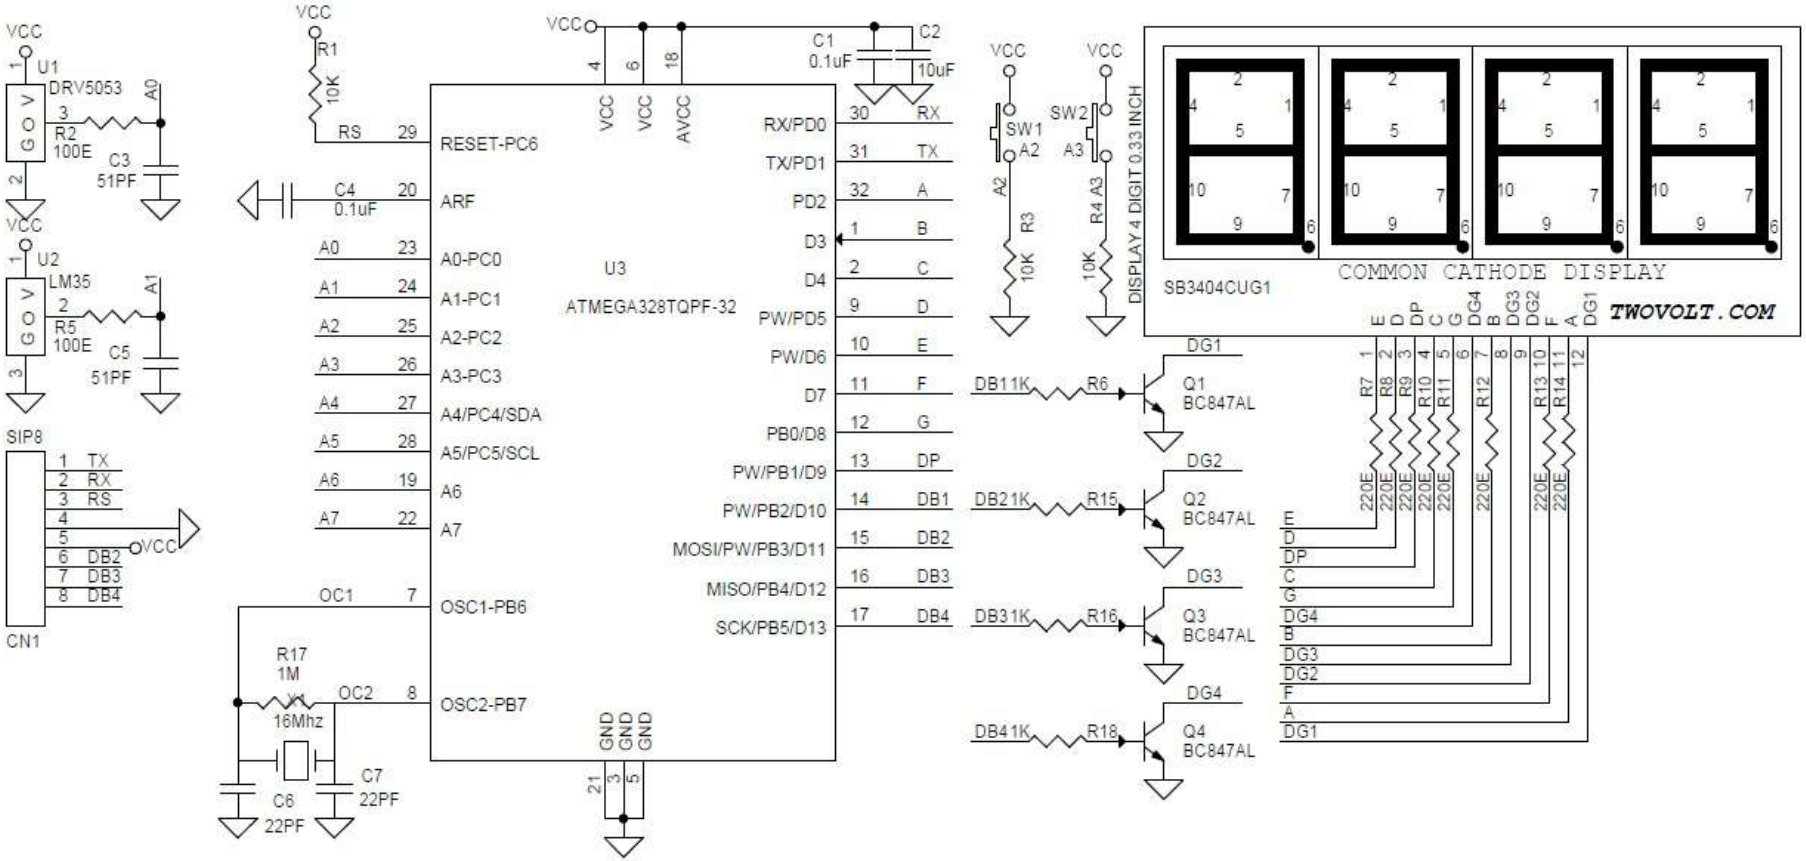

Tiny 4 Digit 7 Segment Arduino compatible module to developed to create few display related projects like, counter, timer, thermometer, games, volt meter, on board connector provided to program the Arduino bootloader and Arduino code using Arduino IDE.

Features

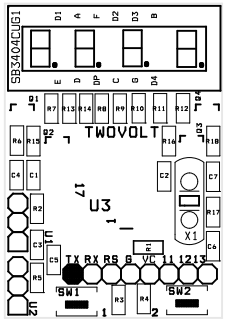

- Supply 5V DC
- 4 Digit 7 Segment Common Cathode Display
- On board AT-mega 328 Chip
- On Board LM35 Temperature Sensor
- On Board Magnetic Flux DRV5053 Sensor
- On Board Connector for Bootloader & Arduino programming
